

## Toppers Speak ...

### How I did it?

I am Khushi Kapadia, a student of RSM 2-years correspondence course and achieved AIR 106 in JEE advanced. I started preparing for IIT entrance exam from the second semester of 10th std. Time management and staying cool under pressure are the key elements for the preparation of the entrance exam. I preferred smart work over hard work and quality over quantity while working. Attending different types of questions in FIITJEE AITS made me confident and solving FIITJEE material improved my logical skills. I never skipped any of the all India tests as it helped me determine my position at the all India level. Tips to students preparing for IIT entrance exams is to work hard consistently and believing in yourself.
