How I did it?

I decided to pursue IIT-JEE as my career in class 9th and my family supported me in my decision. I started my preparation after class 10th but soon I realised that I should join FIITJEE in one way or other to give a final touch to my preparation. So I joined AITS of FIITJEE which was an excellent tool to check my preparation. My preparation was building my basic concept but FIITJEE AITS helped me to find mistakes in my preparation and build new concepts. IIT-JEE preparation includes lots of mental pressure and failure but there is only one key to success, analyse your mistake learn from it and move on. I thank FIITJEE to give AITS as a tool to find my mistake.
