

## Toppers Speak ...

### How I did it?

I have always been fascinated by the growing technology. IITs provide the best platform for me to become a part of this revolution. Although I belong to a predominantly doctor family, my parents always wholeheartedly support my career choices. IITJEE is a very tricky exam. Apart from efforts, you also need able guidance and proper material. FIITJEE correspondence program provided various different way to present the question and ways to tackle it. They had questions ranging from simple yet tricky to questions that used several concepts together. I also attempted FIITJEE All India Test series which showed where I stood. CSCP department is also well made and they clear doubts from root. To all the future aspirants, my advice is to focus on concepts rather than marks and be motivated
