How I did it?

My passion for P, C & M prompted me to select IIT-JEE as a career. My family were supportive of this decision and got me various books from 9th class itself so that I could prepare for IIT-JEE. During the initial phases I found it difficult to find quality material, and I found some question papers of FIITJEE AITS online. They were of very good quality and so I decided to take the FIITJEE Rankers Study Material (2 Years) program. The correspondence program provided me with elegant examples to build my knowledge and then tested my brain with hard but rewarding questions. My course also included the All India Test Series (AITS) through which I learnt to manage my time well even while doing hard questions. The level of AITS was somewhat even above that of JEE Advanced which taught me to deal with difficult question papers. The solutions provided were concise but clear, and the CSCP classes helped me clear my doubts. All in all, I would like to thank team FIITJEE for helping me achieve rank 18 in JEE Advanced 2019.
