

## How I did it?

I, Harshit Gupta joined FIITJEE in 2010 under the 'Computer based All India Test Series (AITS)' Programme.

I started to prepare for IITJEE in class 11<sup>th</sup>.

I joined the 2 year-classroom course at Vidyamandir Classes (Pitumpura Centre) to help me prepare for same.

The major problem that I faced in my preparation was lack of good questions and study materials. That is where FIITJEE played a very important role. Through the AITS, I got access to a large number of good and challenging problems that were innovative, tested every concept and helped me to get a better understanding of the concepts. The FIITJEE's CSCP's filled the necessary gap to build a strong base of concepts.

The competition gave me the necessary boost to work harder and with more determination.

By working hard and with (Signature with date)

full determination and minimum stress,  
- anything could be achieved.

Do not fold the sheet. Put it straight in the enclosed envelope.
