

How I did it?

I Aman Yadav joined FIITJEE's AITS (computer based) in the year 2018-19. I came to know about AITS through ex-FIITJEE students. Giving this test series made me practice JEE paper several times before the actual exam. This gave me a competitive environment to test my skill and regularly track my development. The level of the paper was undoubtedly too good. The biggest thing was that it was computer based test. Every paper was unique and contained new set of questions. The subsequent release of answer keys the next day after paper and release of result after 1 week gave me time to analyse my mistakes and perform better the next time.
