### How I did it?

It was a pretty remarkable journey for me with a lot of memories—both sad and joyous. It was challenging too—since preparing for JEE and attending schools simultaneously was never an easy task.

I had been appearing in FIITJEE's FTRE since class 8 and the standard of questions and the level of competition motivated me to enrol in the All India Test Series of FIITJEE during my JEE preparation. The questions were upto the JEE mark and allowed me to apply the concepts in different and sometimes unpredictable, yet interesting ways.

So finally all the hardwork, dedication and the blessings and guidance of my parents and teachers paid off and I was able to get a decent rank within top 150 in both JEE main and Advanced.

## Parents Speak ....

I quarrid with some of the IIT students about their preparation strategies and how they cracked this challenging and competitive prestigious examination. Most of them suggested that FIITJEE test series was very helpful to them during their preparation.

Based on their feedback my son Hitesh Anand decided to get enrolled in All India Test Series conducted by FIITJEE. This really helped him to a much extent in his preparation. By appearing in the test series conducted by FIITJEE he could raise his level up to standard of IIT JEE mains and advance. This helped him to get a rank within 150 AIR in JEE mains as well as JEE advance.
