

# Toppers Speak ...

## How I did it?

I am Aditya Kumar, AIR 184 in JEE Advanced 2021. My interest in Science and Maths encouraged me to take Engineering as a career. My family fully supported my decision and enrolled me in a coaching and provided the required study material. I had to face many challenges. The limited interaction with teachers in the online classes was the biggest hurdle but I did not let this affect my preparation much.

I started my preparation quite early in 10th. In 10th I completed 50% 11th NCERT. I joined the proper classroom classes of Resonance Agra in 11th standard.

My parents and teachers guided me in my initial preparation. My personality of never giving up and not letting anything get in my way assisted me in my preparation. My hardwork and good study material were the ingredients of my success.

The positive response that I got from my friends and seniors motivated me to join the Correspondance Program of FIITJEE.

Their online CS CP program cleared my doubts and taught me the applications of many concepts. Their AITS helped me to judge where I stood among my peers and encouraged me to work harder. I would recommend this program to every JEE aspirant.

Thank you

Aditya
