## How I did it?

Ever since I was a child, it was my dream to design and develop space technology and hence I pursued engineering. Over the last five years, especially 11<sup>th</sup> and 12<sup>th</sup>, my parents gave their full support for me to achieve my dream. From keeping my motivation up, preparing my favourite food and excusing me from doing chores, they did everything to boost my morale. This was necessary, especially when I was faced with the transition to online mode. But inspite of all the turmoil and uncertainty, I remembered the dream and kept faith in the process. As JEE approached, I signed up with the FIITJEE AITS. By exposing me to tough and unique questions on a regular basis, I developed the skill to take even the hardest questions in my stride. I learned crucial time management skills. Overall, my experience with FITJEE has been amazing. So, to all my fellow learners and students, keep the dream alive and do what it takes!
