

Toppers Speak ...

How I did it?

I feel consistency is the key to my success. I used to study only 8 hrs a day (on days when there were no classes) but I maintained consistency..

Understanding concepts is very important.

Practicing a lot of problems helped me to improve my speed.

I found the FIITJEE tests very hard initially.

I used to panic a lot, but by writing a lot of these tests I was able to overcome that.

I became more calm and composed and got used to a wide variety of questions. So the Test series has helped me immensely.
