

Toppers Speak ...

How I did it?

I joined FIITJEE, AITS test series in 12th std and it helped me a lot as the difficulty level in these tests is very good and comparable to the JEE adv. exams. The post test analysis tools are extremely useful in understanding time management skills, pinpointing weak areas in preparation and also in correcting repeated silly mistakes. The pattern of AITS tests is very similar to actual Mains & Adv. tests which helps to get familiarized with the system.
