

## Toppers Speak ...

### How I did it?

It is rightly said that, "Self belief and hard work will always earn you success." I am Saksham Kathi. I have got All India Rank 18 in JEE Advanced 2022. I think along with hard work, smart work is necessary. One should plan his work daily and then work accordingly. Students should avoid using calculators to minimise calculation mistakes. In order to improve speed and accuracy, one should try to inculcate these characteristics in homework. FIITJEE Rankers study material is very detailed. It has good theory and a vast variety of questions. I found it really very helpful during my preparations. One may also perform physical exercises and meditation to improve concentration power.
